

repo https://github.com/cdavis4/Group4_Project

The screenshot shows the GitHub interface for the repository 'cdavis4 / Group4_Project'. At the top, there are tabs for 'Code', 'Issues' (0), 'Pull requests' (0), 'Projects' (0), and 'Wiki'. Below the repository name, it says 'OSU 162 Project Group 4' with a link to 'Add topics'. A summary bar shows '5 commits' and '1 branch' (highlighted in yellow). Below this, there's a 'Branch: master' dropdown and a 'New pull request' button. A 'Switch branches/tags' modal is open, showing a search bar 'Find or create a branch...' and a list of branches: 'master' (checked), 'Menu.hpp', 'Predator-Prey Input Test Plan.docx', and 'README.md'. To the right of the modal, a commit history is visible with entries like 'Added an initial Critte', 'updated Critter to adc', 'Menu code', 'Menu code', 'Menu code', and 'Initial commit'.

Create branch

Click on branch and click on your branch to switch from master

Upload Files - great thing is these can always be reverted!

You may also install git and do this.

<https://git-scm.com/book/en/v2/Getting-Started-Installing-Git>

I've used sourceTree before because it's more visual and free
